

International Tax Case Padlet Supplement for the SDG Case

Note to Instructors –

[Padlet](#) is a free, online, productivity software that enables students to collaborate and share ideas by posting to walls, canvasses, timelines, maps, etc. It is available in 29 languages and easily shared for international collaborations. Files may be uploaded from computers and pictures and videos may be taken from personal devices or link from the web.

This [padlet](#) offers a graphical depiction of the functional analysis of Sophia's Dream Group. The pins reflect the entities' respective activities as per the case study narrative.

The padlet may be replicated and assigned to groups of students for various activities. Pins may be easily added for the countries' corporate tax summaries (early challenge), show locations of the permanent establishments and make connections between the PEs and the foreign entity as well as transfer pricing connections between associated entities.
